RIMAGE MEDICAL DISC DEVICE™ 2410

A Powerful In-House Solution For Your DICOM CD/DVD Production

The Rimage MDD 2410 system is a high-performance, front-office solution for automated Patient CD/DVD Production. Your Medical Imaging workflow will benefit from a fully automated and intelligent in-house robotic solution with a low long-term cost of ownership.

Benefits

Affordable

The Rimage MDD 2410 is the most affordable disc publishing system with a thermal printer. It is the easiest way to get Rimage quality publishing in an affordable package. All you need is a PC, the solution software and you are ready to go.

Network connectivity

The MDD 2410 system can be easily networked using an external PC.

Integrated printer

Rimage's Everest® 400 printer is the market's only fully integrated thermal retransfer printer, providing indelible, high-resolution images and sharp, easy-to-read text. Unlike inkjet printing, thermal reftransfer printed labels will not scratch, smear, peel or fade over time.

Unmatched performance

The three-bin carousel with optional 50-disc output bin enables multiple patient discs and media types to run concurrently. Publish up to 50 CD-Rs, DVD-Rs, or Blu-ray Discs™ per hour with hands-free operation.

Options
- Blu-ray recorders
- 50-disc external output bin

Features

Backed by Rimage's decades of experience in designing and building hardware, the MDD 2410 standard features include:

- Integrated DiscWatch™ status light
- Two quick-release front-swappable recorders
- LCD status display
- Rotating three-bin 150-disc carousel for input/output
- External five-disc output bin
- Integrated Everest 400 thermal retransfer printer
- Internal lighting
- USB 3.0 connectivity

SYSTEM SPECIFICATIONS

	MEDICAL DISC DEVICE 2410
CPU/RAM/HDD	User Supplied
Number of Recorders	2 CD/DVD (optional BD)
Carousel / Total Capacity	3 bins / 150 discs
